

FB1800A Graphite Packing

(IMPA Code: 81-02-41~55)

Type of fluid medium suitable: Heated oil, Keton, Estel.

Applications: Pump shaft, rod and valve stem.

Temperature range : <350°C

Pressure: 2.94MPa

Sliding speed: 8m/sec

PH level: 5 to 11

Construction: Eight strands, Braid over Braid

FB1800A Graphite Packing is made by lattice-braiding asbestos yarns treated with oil-resistant lubricant and is impregnated with graphite. Its unique lattice braiding enhances the elasticity of the packing while its tightly knitted yards remain intact even under high pressure. Graphite is added to reduce abrasion.
